Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6, & 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Slates 5,406,712.

Slates shows a sight pin block having sight pin openings 15 for a series of sight pins. To adjust the sight of Slates, one would fire test shots for different yardages to determine the correct positioning of each of the five pins 31. These pins would then be locked in position using screws 41. The pin positioning would then be correct for a bow having a speed of the test bow (say, 280 feet per second). If the sight pin block were to be transferred to another bow with a speed of 280 feet per second, it would only be necessary to determine the corresponding arrow flight range for one of the pins; each of the other pins will then be in correct position.

Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3712

Applicant's arguments filed 10/15/01 have been fully considered but they are not persuasive.

The only structure required by applicant's claims is the "sight pin block having sight pin openings for sight pins located therein ... at fixed distances for a given bow speed"; Slates shows this structure including block 3 having openings 15 at fixed distances. The remainder of the claim, "so that when a single sight pin is manually positioned ...", is a functional statement or suggested use that does not define structure beyond that of Slates. True, Slates does not advocate removing the sight from one bow and placing it on another, but applicant's claims do not require this method.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for

reply expire later than SIX MONTHS from the mailing date of this final action.
